SUMMARY

Information Science and Engineering graduate skilled in SQL, Python, Power BI, and Excel, with hands-on experience in data analysis, dashboard development, and business intelligence projects. Experienced in transforming data into actionable insights through analytics and visualization.

EXPERIENCE

Python Full Stack Intern

Feb 2026 – May 2026

KodNest Technologies Pvt Ltd

Bengaluru, India

- Developed full-stack web applications using Python, SQL, React, HTML, CSS, and JavaScript.
- Implemented database operations using SQL to support application functionality and data management. Utilized Git and GitHub for version control and collaborative development workflows.
- Contributed to application development through feature implementation and enhancements.

TECHNICAL SKILLS

- **Programming & Query Languages :** Python, SQL.
- **Data Analytics & Visualization :** Data Analysis, EDA, Data Cleaning, Statistical Analysis, Power BI, Tableau, DAX, Power Query, Pandas, NumPy, Excel.
- **Databases & Cloud :** MySQL, PostgreSQL, MongoDB, Google Cloud Platform (GCP).

PROJECTS

1. Blinkit Retail Intelligence & Supply Chain Analytics Dashboard

- Performed data cleaning, EDA, feature engineering, customer segmentation, CLV, market basket, product, inventory, and marketing analysis using Python, translating findings into business KPIs and actionable insights.
- Built an interactive Power BI solution using DAX and Power Query with executive, customer, product, supply chain, and marketing dashboards to evaluate revenue, ROAS, conversion, inventory risk, and operational performance for decision support.

2. Demand Forecasting & Inventory Optimization Dashboard

- Engineered demand and inventory features from retail sales, store, transaction, holiday, and external-factor data using Python, Pandas, and NumPy for predictive analysis and stockout-risk assessment.
- Applied machine learning forecasting and transformed model outputs into reorder points, recommended order quantities, and risk indicators, then built Power BI dashboards to support demand planning, inventory allocation, replenishment, and executive decision-making.

3. StockMind

- Built an AI-powered financial intelligence application using Next.js, FastAPI, SQLite, and Google Gemini to integrate real-time market data, interactive financial visualizations, sector classification, competitor discovery, and news sentiment analysis.
- Implemented analytical features for portfolio performance, price-sentiment divergence, behavioral scoring, and adaptive feedback, enabling users to evaluate trading behavior and make informed decisions through simulated market scenarios.

EDUCATION

- **BMS Institute of Technology and Management** – BE in ISE | CGPA : 9.46 2022 - 2026
- **Narayana PU College** – Score : 96.5% 2020 - 2022
- **St. Mary's Convent** – Score : 93.28% 2007 - 2020

CERTIFICATIONS

- Google Data Analytics Professional Certificate - Coursera (August 2025)
- Google BigQuery & PostgreSQL : Big Query for Data Analysis - Udemy (August 2025)
