SUMMARY

Information Science and Engineering graduate skilled in SQL, Python, Power BI, and data analytics. Experienced in developing dashboards, performing data analysis, and generating business insights through analytics-driven projects. Passionate about leveraging data to support informed decision-making and business growth.

EXPERIENCE

Python Full Stack Intern

KodNest | Feb 2026 – Jun 2026

- Developed full-stack web applications using Python, SQL, React, HTML, CSS, and JavaScript.
- Implemented database operations using SQL to support application functionality and data management. Utilized Git and GitHub for version control and collaborative development workflows.
- Contributed to application development through feature implementation and enhancements.

TECHNICAL SKILLS

- **Programming & Query Languages :** Python, SQL.
- **Data Analytics & Visualization :** Power BI, Tableau, DAX, Power Query, Pandas, NumPy, Excel.
- **Databases & Cloud :** MySQL, PostgreSQL, MongoDB, Google Cloud Platform (GCP).
- **Tools & Technologies :** Git, GitHub, REST APIs.

PROJECTS

1. Blinkit Retail Intelligence & Supply Chain Analytics Dashboard

- Built an end-to-end retail business intelligence solution using Python, Power BI, and Excel to deliver executive, customer, product, marketing, and supply chain insights from retail data.
- Developed six interactive dashboard modules covering customer segmentation, customer lifetime value (CLV), product performance, inventory health, marketing effectiveness, and executive reporting to support data-driven business decisions.

2. Demand Forecasting & Inventory Optimization Dashboard

- Developed an end-to-end retail analytics and supply chain intelligence solution using Python, machine learning, and Power BI for demand forecasting, inventory optimization, stockout risk assessment, and replenishment planning.
- Designed 10 interactive dashboard modules covering forecasting, inventory, customer, product, regional, and executive analytics to support data-driven decision-making.

3. StockMind

- Built an AI-powered financial intelligence and virtual trading platform using Next.js, FastAPI, SQLite, and Google Gemini, integrating real-time market data, interactive visualizations, competitor analysis, news sentiment analysis, and cryptocurrency tracking.
- Developed a virtual trading platform featuring portfolio management, behavioral scoring, adaptive mentorship, price alerts, and guided learning to improve trading decision-making.

EDUCATION

- | | |
|---|-------------|
| • BMS Institute of Technology and Management – BE in ISE CGPA : 9.46 | 2022 - 2026 |
| • Narayana PU College – Score : 96.5% | 2020 - 2022 |
| • St. Mary's Convent – Score : 93.28% | 2007 - 2020 |

CERTIFICATIONS

- Google Data Analytics Professional Certificate - Coursera (August 2025)
- Google BigQuery & PostgreSQL : Big Query for Data Analysis - Udemy (August 2025)
